PedalBox Pro: Simple 3-Step Installation

Installing the **PedalBox Pro** is quick, clean, and requires no special tools. Thanks to seamless pairing between the **Pro Remote** and **Pro Base**, plus intelligent auto-calibration via **PerfectTune**, you'll be enjoying a noticeably more responsive drive in minutes.

Before You Begin:

Turn off your vehicle's ignition and wait at least **5 minutes** to ensure all electrical systems are fully powered down before installation.

Install in Just 3 Easy Steps

1. **Unplug the Factory Throttle Connection**

Locate your accelerator pedal and disconnect the OEM throttle plug from the vehicle's wiring harness.

2. **Plug in the PedalBox Base Unit**

Connect the PedalBox inline using the supplied OEM-style connectors. It's completely plug-and-play—no cutting or programming required.

3. **Mount the Pro Remote**

Attach the wireless **Pro Remote** to your key fob, dash, or the included PedalBox mount. That's it—you're

ready to experience next-level throttle control.

→ Remote Pairing Made Simple

Pairing the **Pro Remote** with the **Pro Base** takes just seconds:

- Press and hold the “+” **button** on the remote
 - The blue LED will flash to confirm pairing
 - The remote then displays your current driving mode
-

PerfectTune™: Smart Self-Learning Calibration

Customize your throttle response to match your exact vehicle and driving style with **PerfectTune**—the built-in auto-calibration feature.

Here’s how to activate PerfectTune:

1. Choose your preferred mode (Eco, City, Sport, or Sport+)
 2. Press and hold the **+ and - buttons together** for 3 seconds
 3. PerfectTune is now active
 4. Perform a few smooth pedal presses from 0% to 100%
 5. Done! Your PedalBox is now individually calibrated
